DHYANA SWAIN

STAFF / SENIOR SOFTWARE ENGINEER

Bangalore, India | (+91) 9986656413 | dhyana_swain@yahoo.com | LinkedIn: linkedin.com/in/dhyana-swain | GitHub: github.com/dhyanaswain

PROFESSIONAL SUMMARY

Staff-level Software Engineer with 10+ years of expertise in designing, architecting, and scaling high-throughput web applications, microservices, and micro-frontends. Core expertise in Node.js, TypeScript, GraphQL, React, Rust, Java, AI integration, and cloud ecosystems (Azure/AWS). Proven track record of leading multi-quarter strategic engineering initiatives, steering product discovery with Product Managers and TPMs, driving live user experimentation, integrating GenAI/LLM pipelines, and deploying resilient systems with 99.99% availability across retail, data-intensive platforms, and fintech enterprise systems.

TECHNICAL SKILLS

Languages	TypeScript, JavaScript (Node.js, Express), Rust, Java, GraphQL, HTML5, CSS3, SASS, SQL, Python
AI & GenAI Engineering	LLM API Integration (OpenAI API, LangChain), Prompt Engineering, RAG (Retrieval-Augmented Generation), Vector Databases, AI-Assisted Developer Tooling
Frontend Arch.	React.js, Angular (2+), Micro-frontends, Redux, React Hooks, Storybook, Bootstrap
Backend & Middleware	Node.js Middleware Applications, Java Backend Services, RESTful APIs, GraphQL Federation, Microservices, Content Management (Sitecore)
Databases	Relational Databases (MySQL, SQL), NoSQL (MongoDB), Vector Databases
Cloud & DevOps	Azure, AWS, Docker, Jenkins, CI/CD, Git, Bitbucket
Testing & Tools	Jest, Karma, Postman, Splunk, Jira, Agile/Scrum

WORK EXPERIENCE

Senior Software Developer — Walmart Global Technology

Bangalore, India | 09/2024 – Present

- **End-to-End Technical Ownership:** Led multi-quarter strategic engineering initiatives from initial architectural design through execution and delivery, driving cross-functional alignment with Product Management and TPM teams.
- **Middleware & Backend Systems:** Engineered high-throughput Node.js middleware applications and integrated with Java-based backend microservices, leveraging Rust for performance-critical modules and GraphQL for efficient data orchestration.
- **AI & LLM Integrations:** Integrated GenAI microservices and custom prompt engineering workflows (OpenAI APIs / RAG pipelines) into internal platforms to automate data enrichment and optimize developer productivity.
- **Product Discovery & Architecture:** Spearheaded discovery phases and system design RFCs for core middleware platforms using Node.js, TypeScript, and GraphQL, ensuring high availability and zero-downtime scalability.
- **Frontend Architecture & Reusability:** Scaled enterprise frontend architecture using modular React components and Storybook, increasing UI code reusability by 40% across internal tools.
- **Experimentation & Production Launch:** Managed phase-gated A/B experimentation rollouts with real user cohorts to validate performance metrics, successfully launching products to production while maintaining 99.99% system availability.
- **Observability & Mentorship:** Established system monitoring via Splunk and OpenObserve to decrease MTTR by 30%, while mentoring 8+ engineers across agile teams.

Senior Software Developer — Aptos India Private Limited

Bangalore, India | 05/2023 – 09/2024

- Designed and delivered high-availability Node.js and TypeScript microservices for retail POS and eCommerce platforms processing 1.5M+ daily transactions.
- Built secure payment pipeline integrations into React Native and React applications, maintaining strict compliance and sub-second transaction latency.
- Spearheaded technical execution within Agile/Scrum frameworks, translating complex functional requirements into resilient, decoupled microservice architectures.

Senior Software Developer — **Wells Fargo** Bangalore, India | 05/2021 – 10/2022

- Served as Technical Lead for the MNRVA enterprise platform, driving end-to-end design and system integration using TypeScript, Node.js, and React.
- Implemented micro-frontends with GraphQL API federation, reducing client-side payload sizes by 45% and lowering application load times.
- Managed non-functional requirements (NFRs) for high-concurrency banking workflows on Azure cloud infrastructure.

Application Development Specialist — **Accenture** Bangalore, India | 06/2019 – 05/2021

- **CMHC CRM Services:** Built Azure-hosted Node.js/React solutions and automated CI/CD pipelines, increasing deployment frequency by 50%.
- **AIP.Next Core (Chat Bot):** Led development of an automated AI chatbot backend using Node.js, Express, Python, and MongoDB on AWS, handling over 100k daily user sessions.
- Collaborated directly with business stakeholders to convert complex user stories into production-ready responsive interfaces and scalable REST/GraphQL APIs.

Senior Project Engineer — **Wipro** Bangalore, India | 10/2018 – 06/2019

- **Contracts Intelligence & Entity Extraction:** Engineered automated NLP and data extraction platforms using Node.js, GraphQL, and Python on AWS.
- Developed high-performance SQL-centric data exploration dashboards and interactive data pipelines using Angular, Bootstrap, and MongoDB to visualize complex analytics for telecom enterprises.

Web Developer — **Theorem India Pvt. Ltd.** Mysuru, India | 05/2016 – 09/2018

- **Wealth Management App:** Built a responsive wealth management platform tracking customer portfolios, asset allocations, and mutual fund performance with interactive data exploration tools.
- Implemented dynamic data bindings using Angular, HTML5, Less, and Node.js backends connected to MongoDB.

EDUCATION

Bachelor of Technology (B.Tech) — Biju Patnaik University of Technology Rourkela, India | 2008 – 2012
